On the venation and tracheation of the Lepidopterous fore-wing.

[Abstract.]

On the basis of observations made on the changes of the tracheation in living pupae of *Colias croceus* (Fourcroy), *Pieris rapae* (Linn.) and *Papilio machaon* L. the venation of the fore-wing of butterflies is discussed and the various systems of venational nomenclature compared.

2. Communications and exhibits the titles of which have been received since the circulation of these agenda.

Fellows are particularly requested to bring suitable exhibits to the General Meetings even though it may not be possible to announce their intention to do so before the meeting.

Tea will be served in the Library after the meeting.
